SuperSkills

106 Pro Skills for Claude Code

Supercharge your AI coding assistant

A product presentation

The Problem

Developers are leaving performance on the table

Pain Point	Impact
Generic responses	Claude Code doesn't know your stack's best practices out of the box
Prompt engineering fatigue	Hours spent crafting the perfect prompt for each framework
No domain expertise	No built-in knowledge of Next.js 15 patterns, Supabase RLS, Tailwind v4, etc.
Inconsistent output	Different quality every time you start a new conversation
Context lost	Best practices and conventions must be re-explained every session

> *"I spend more time explaining what I want than actually building."*
> -- Every developer using AI assistants without proper configuration

---

The Solution

SuperSkills: Pre-built expert skills for Claude Code

Turn Claude Code from a **generalist** into a **specialist** in any domain.

How it feels:

```
You:  /nextjs-pro
Claude: I'm now a Next.js 15 expert. I'll use App Router, Server
Components,
        proper caching strategies, and follow all current best
practices.
        What are we building?

You:  /supabase-pro
Claude: I'm now a Supabase specialist. I'll set up RLS policies,
optimize
        queries, use edge functions properly, and follow security
best practices.
        Show me your schema.

You:  /landing-page-conversion
Claude: I'm now a conversion optimization expert. I'll structure
your page
        for maximum conversions using proven frameworks,
psychological triggers,
        and A/B testing best practices. Let's optimize.
```

Just type `/skill-name` and go. No prompting. No explaining. Instant expertise.

By The Numbers

Category Breakdown

Full Category Table

#	Category	Skills	Focus Areas
1	**Frontend Development**	11	React, Next.js, Vue, Svelte, Tailwind, Framer Motion
2	**Backend & Frameworks**	14	Node.js, Python, Django, Rails, Go, Rust, GraphQL
3	**Databases & Data**	6	PostgreSQL, Supabase, MongoDB, Redis, Prisma
4	**DevOps & Infrastructure**	11	Docker, K8s, CI/CD, AWS, GCP, Terraform, Vercel
5	**API & System Design**	5	REST, GraphQL, WebSockets, Microservices
6	**Code Quality & Security**	7	Testing, Linting, Security Audits, Performance
7	**Conversion Optimization**	10	Landing Pages, CTAs, A/B Testing, Funnels
8	**SEO & Content**	9	Technical SEO, Content Strategy, Schema Markup
9	**Sales & Outbound**	6	Cold Email, LinkedIn, Outreach Sequences
10	**Marketing Strategy**	9	Growth, Analytics, Copywriting, Brand
11	**AI & Machine Learning**	4	LLMs, RAG, Fine-tuning, ML Pipelines
12	**Specialized Domains**	5	FinTech, HealthTech, EdTech, Real Estate
13	**Platform-Specific**	4	Shopify, WordPress, Webflow, Bubble
14	**Testing & Automation**	3	E2E Testing, Load Testing, Test Strategy
15	**Enterprise & Architecture**	3	System Design, Migration, Compliance
	TOTAL	**106**	

How It Works

1

Buy

$50 one-time payment via Stripe. Secure checkout. Instant confirmation.

2

Download

Instant ZIP download. All 106 skills included. No waiting.

3

Install

Unzip to `~/.claude/skills/` and start using immediately.

```
# That's literally it:
unzip superskills.zip -d ~/.claude/skills/

# Now in Claude Code:
/nextjs-pro
/supabase-pro
/landing-page-conversion
# ... 103 more skills ready to go
```

Before vs After

Pricing

One-Time Purchase

$50

< $0.50	1 Year	106
per skill	free updates	pro skills included

No subscriptions. No hidden fees. No upsells. Pay once, use forever.

ROI Comparison

Option	Cost	What You Get
Hire a consultant for 1 hour	~$150-300	One framework, one session
Build your own skills (106)	~40-80 hours of work	DIY, no guarantees
Online courses (multiple)	$500-2,000	Learning, not doing
SuperSkills	**$50 one-time**	**106 expert skills, instant, production-ready**

Tech Stack

Built with modern, proven technologies

Layer	Technology	Purpose
Framework	Next.js 15 (App Router)	SSR, RSC, performance
Styling	Tailwind CSS v4	Utility-first, responsive design
Animations	Framer Motion	Smooth, performant animations
3D Effects	Three.js	Interactive hero visuals
Payments	Stripe Checkout	Secure, trusted payments
Hosting	Vercel	Edge network, instant deploys
Analytics	Vercel Analytics	Performance monitoring

> The SuperSkills landing page itself is built using SuperSkills best practices -- we eat our own dog food.
